

Governor Gray Davis
State Capitol
Sacramento, CA 95814

Dear Person For Which I Voted!:

Please help California remain a Natural Beauty. Overpopulation and selfish human acts steadily destroy the world we all depend upon for continued survival...

I write to express my desire that the CALFED Program invest in Water Efficiency for at least seven years before new dams or reservoirs are considered. Please restore our rivers, bays and fisheries by providing adequate fresh water and protecting riverbeds and aquifers, as well as surrounding land! PLEASE enforce pollution limits. Discourage SUV(Silly Unnecessary Vehicle) and truck needless use. They pollute, cause worse accidents: minor body damage to major human injury damage!

Finally why should taxpayers pay for studies of new dams they don't want? Any dam that removes needed water from valuable, age-old watersheds! Ain't broke don't fix! Our days of manipulating the environment should be waning.

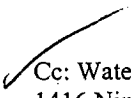

Humans are being affected meteorologically and medically. When you change the evolutionary balance, you change the world! It may have been a campaign promise, but it's bad news for our future!

Please consider these pleas as you influence others!

Sincerely,

Paige E. Heggie
